1. Introduction

1.1. Overview

The UI application of the SDR Reference Implementation allows the user to view and search Study Definitions. The UI features include -

- List Study Definitions and Details
- Search Study Definitions
- View Audit Trail for a Study
- Compare Study Versions

1.2. Scope of Document

This document details the list of UI features available in Study Definition Repository and provides steps for navigation. The technical design and implementation of these features is out of scope.

1.3. Intended Audience

The document is a guide for users/vendors who want to view and search the study definitions using SDR UI.

1.4. Prerequisites

- Valid client certificate for the SDR application installed in the local machine.
- User should be part of Azure Active Directory of SDR Azure subscription.

1.5. Definitions and Acronyms

Term / Abbreviation	Definition
API	Application Programming Interface
DDF	Digital Data Flow
SDR	Study Definition Repository
URL	Uniform Resource Locator

2. SDR UI features

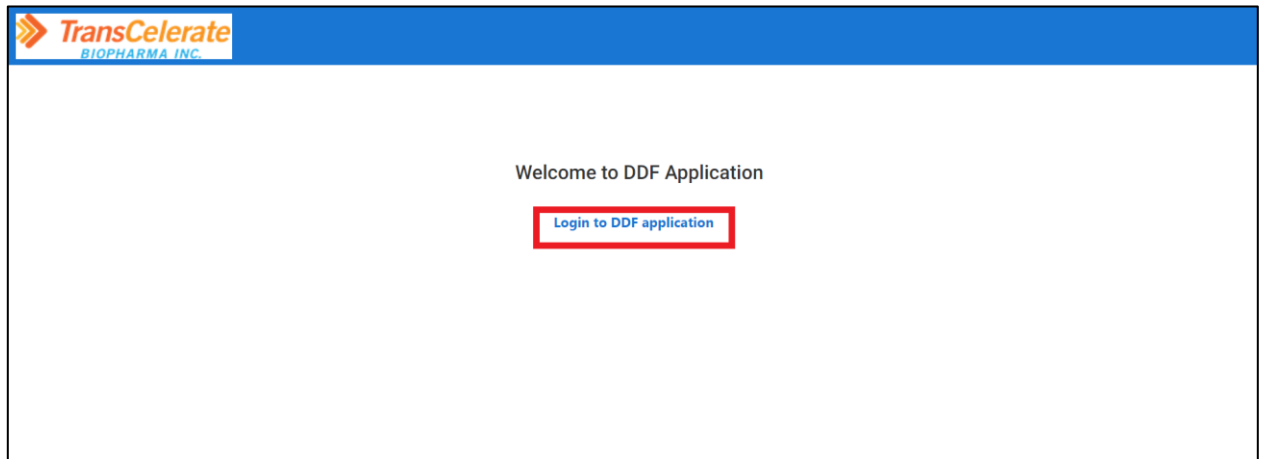

SDR UI Implementation has following features.

2.1. Login

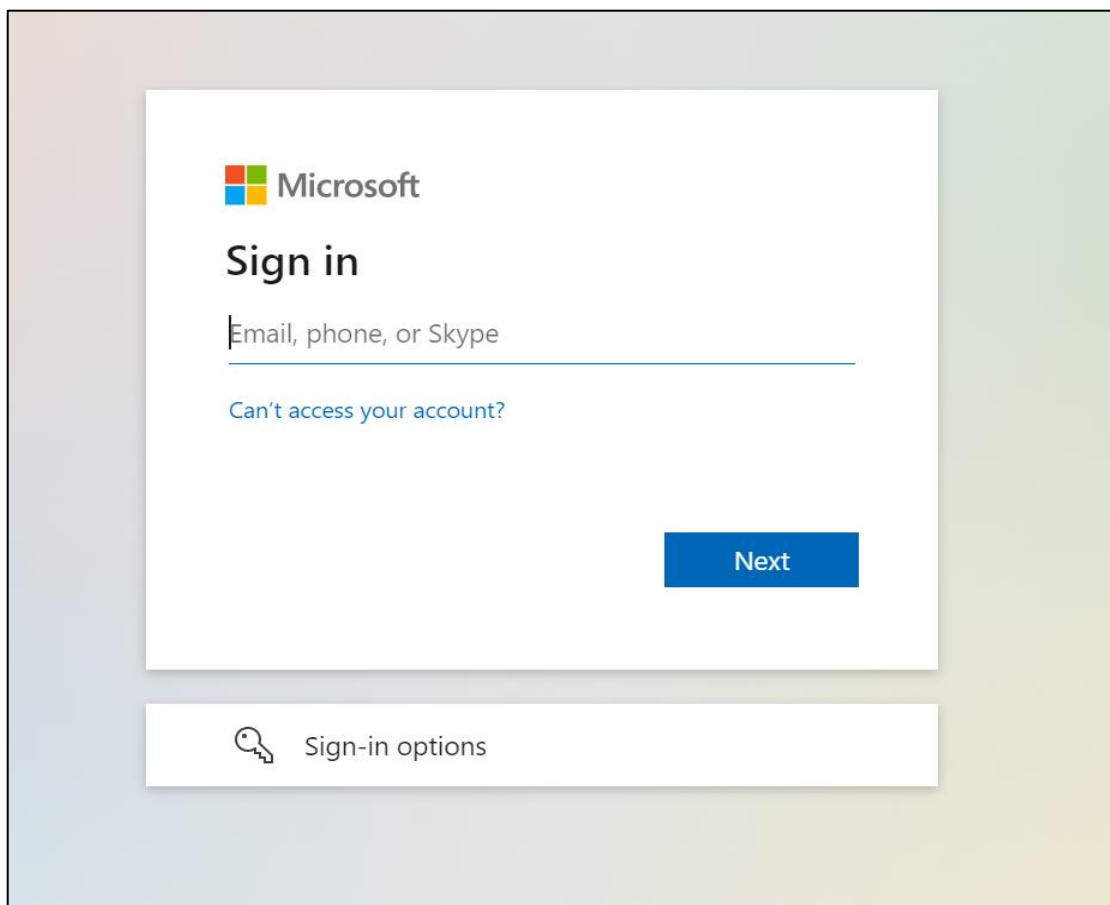

This feature allows the user to login to the application.

STEPS:

- i. Launch the website.
Url: **<https://apps-sdr-qa-eastus-001.azurewebsites.net>**

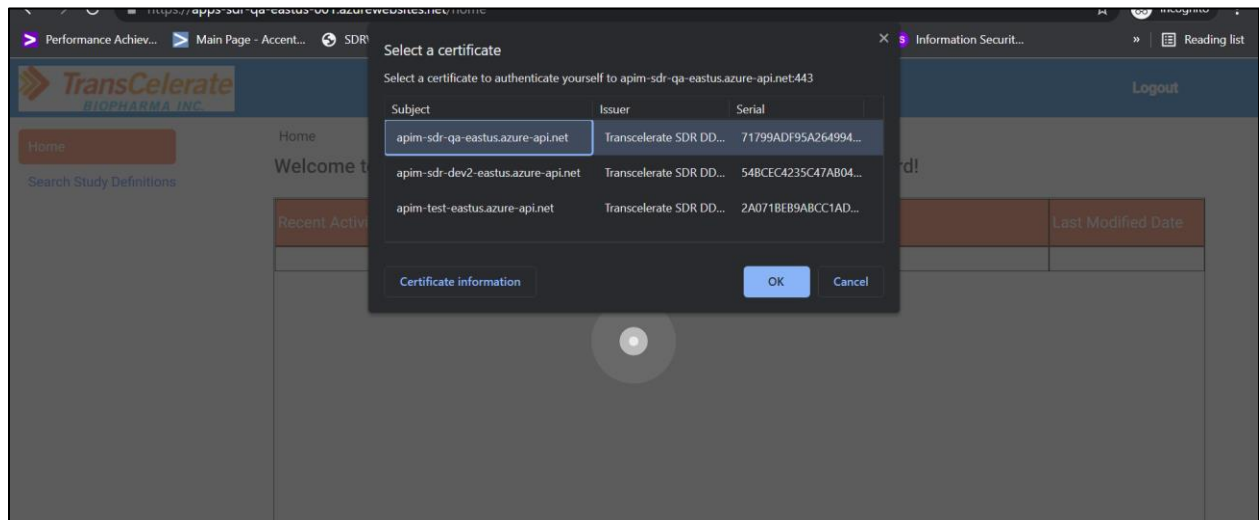

Figure 1 Login Page

- ii. On click of login link, user is redirected to provide credentials as shown below.

Figure 2 Sign in Page

- iii. On successful authentication, user is redirected to the Home Page. When prompted user must select the environment specific client certificate.

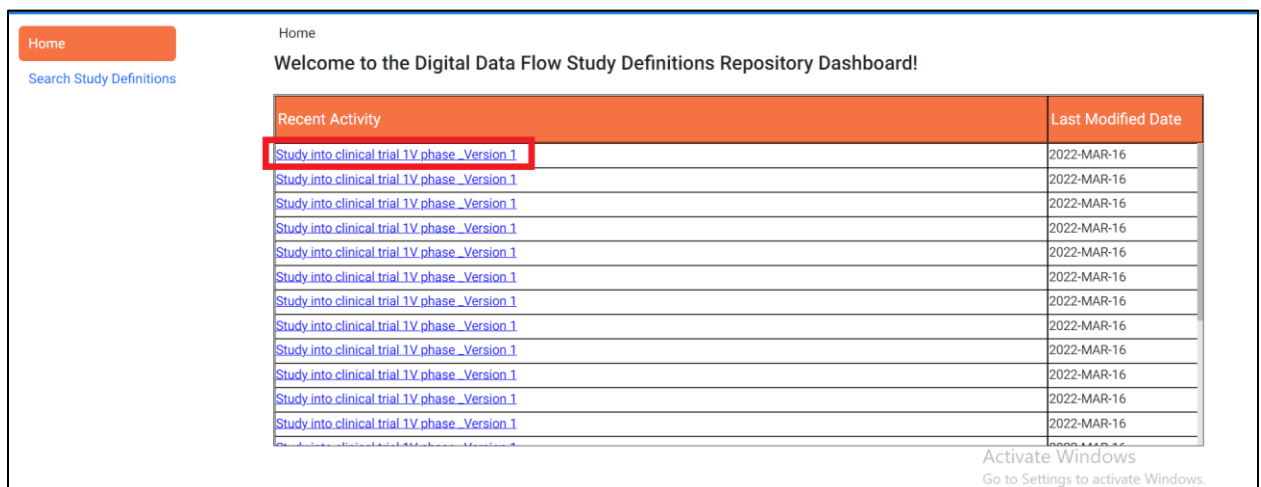

Figure 3 Selection of certificate

2.2. Recent Activity Widget

On the Home Page, the Recent Activity Widget screen shows the list of Study Definitions modified over the last 30 days, with most recently modified definitions on the top. The top 20 documents are listed first and the remaining come into view as the user scrolls.

Figure 4 Recent Activity Widget

2.3. Search Study Definitions

STEPS:

- i. On click of Search Study Definitions in the left menu, user can navigate to search page, where it allows user to search specific study with certain search parameters.

- ii. On entering the search parameters, click on Search to get the matching study definitions. At least one search parameter is mandatory. Below is the list of search parameters:

Field Name	Field Type
Study Title	Plain Text. Allows alphanumeric characters only.
Sponsor Id	Plain Text. Allows alphanumeric characters and "." Character only.
Intervention Model	Plain Text with Suggestions
Phase	Plain Text with Suggestions
Modified From	Date Picker
Modified To	Date Picker
Indication	Plain Text. Allows alphanumeric characters only.

- iii. Columns in the search results are sortable (ascending/descending).
- iv. The top 20 documents are listed first, and the remaining results come into view as the user scrolls.
- v. For multi values field like Sponsor Id and Interventional Model, the first value from the list will be displayed as a link. On clicking the link all the values are displayed in the modal. If there is only one value, it will be displayed as text.

Figure 6 Multiple Value Popup

2.4. Study Details

On click of any study title link from either Recent Activity widget or from Search results, study details page will be displayed, grouped by sections. User can expand each section to view detailed information as shown below.

2.5. Audit Trail

STEPS:

- On click of View History / Audit Trail on the Study details page, audit trail page for the study will be loaded. This screen allows the user to view the audit history for the study definition selected.
- Columns in the results are sortable (ascending/descending).
- User can compare any two versions by selecting the corresponding radio buttons in columns "Compare A" and "Compare B".

Figure 9 Audit Trail Page

Date	System	(SDR) Record Version	Tag	Status	Compare A	Compare B
2022-MAR-16		3	1.1Final	InProgress	<input type="radio"/>	<input type="radio"/>
2022-MAR-16		2	1.1Final	Approved	<input type="radio"/>	<input type="radio"/>
2022-MAR-16		1	1.0Draft	New	<input type="radio"/>	<input type="radio"/>

2.6. Version Comparison

STEPS:

- On click of Version Comparison as shown in above screenshot, version comparison page will be loaded. This screen allows the user to compare two version of same study.
- User can navigate between the pages using the breadcrumb as highlighted in the screenshot.
